

## Q&A

Back to School – Legal Liability and Risk Management • May 26, 2020

1. I think this question for Stephen from TieCare "How the insurance provider define this COVID-19, and does the insurance scheme offer any benefits for the international staff with insurance coverage at the international schools?"
2. Is the School obliged to give a (certain%) refund to the families? If it is not how the School should manage a possible legal action from parents asking for a refund? Is the school legally prosecuted?
3. IF we cannot eliminate all risk, should we have parents sign a disclaimer if they are to send their children back to school in August?
4. Hallo! Can you argue about the interactions between health checks for covid in the schools and protection of personal data? Thanks
5. What happens if a member of staff for example a security guard or receptionist trained to take temperature of people coming into campus end up with the virus... Is the organization liable?
6. Can a school mandate a staff member or student get tested if they visibly demonstrate flu-like symptoms in order to return to work/school?
